

Scott J. Stewart

Technology Specialist

617.646.8412

Scott.Stewart@WolfGreenfield.com

Scott Stewart assists the firm in patent prosecution in the areas of mechanical engineering with a focus on consumer products.

Prior to joining Wolf Greenfield, Scott was a Technical Project Manager at SharkNinja, where he led the development of several products including the Ninja® Foodi™, the world's first commercially available combination pressure cooker air fryer.

Prior to SharkNinja, Scott was a member of Raytheon's Immersive Design Center, where he led and coordinated design reviews and represented the company during presentations to domestic and international customers, partners and government officials.

For his senior capstone project, Scott partnered with electrical and software engineers to design and prototype a winter sports glove containing a flexible Bluetooth enabled multi-touch trackpad.
